

**LONG CHIFFON DRESS TUTORIALS**

Tis so easy infact you all should have more than one set. cheesy

Fabric-2 yards of chiffon

Elastic thread.

Matching thread

Measurements areas.

Back- 36 (because of my cut in sleeve)

Neck -7

Half length-16

Full length - 60

Because I am using  $36 \times 2=72$

I don't have to measure bust and hip. As for the waist I will need to gauge it with my elastic.

Note that you can use your own measurement.

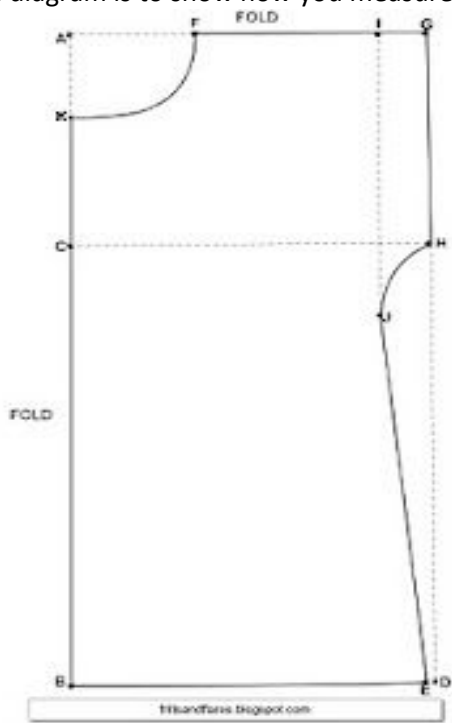

Follow the pictures to see how to cut it

the one with sleeve is first.

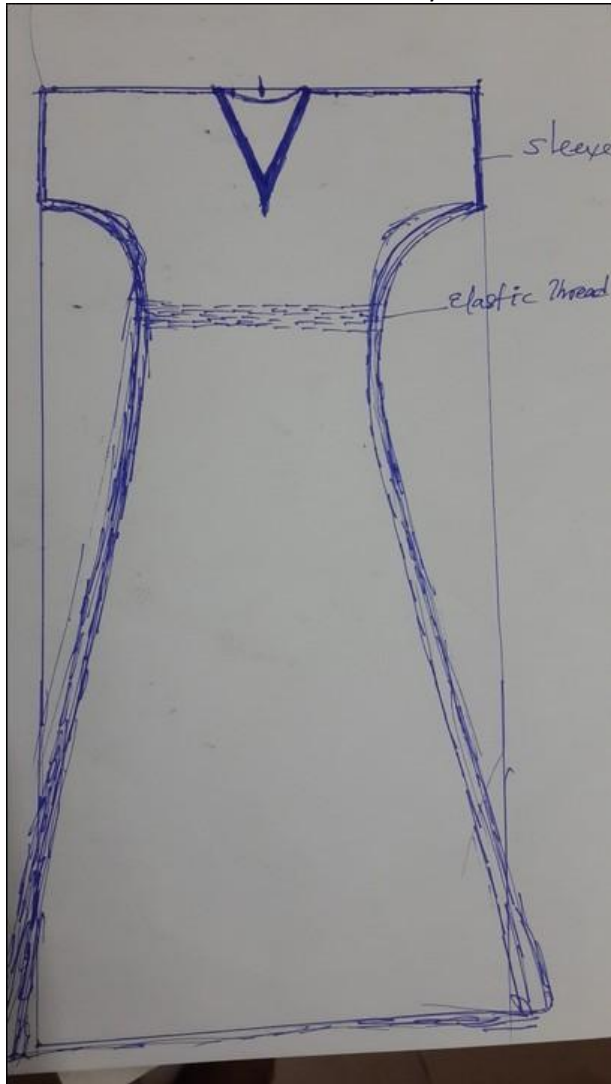

I fold my 72 into 4 equal parts giving me 18

I measure out the depth of my neck line and the wideness of my sleeve.i also indicate where I want the elastic to be. In all my cut must be bigger than my actual size so that the effect of the elastic thread will show after I sew it.

The diagram is to show how you measure the neck line and arm hole

Next add the waist line elastic then your desired length. Do not forget seam allowance

Sew the sides and if need be the shoulder as well because you may decide not to cut the shoulder part open

Note that depending on how low you measure your half length which is shoulder to waist line you will have it looking like the one in the picture

Here is the sleeveless one. on like the other that the sleeve is cut into it, this one we cut out the sleeve
