

PAGE 50-51: JUMPSUIT/ BREAST PAD TUTORIAL.

HOW TO MAKE A JUMP SUIT

pls study this diagram carefully to help you make a Jumpsuit

PADDED BREAST -ON PAD TUTORIAL

So first the measurement

(Note that this is free hand method)

Shoulder or Back -16

Neck depth -8

Sleeve length 10

Bust Length, Bust circumference

Upper bust 8 , 40

Bust point 10, 42

Under bust 13, 38

Waist 16, 36

Hip 23, 46

Full length 58

Now time to cut my front and back bodice, the band, the sleeve and the full flare skirt.
To cut the front bodice which would be like a tube, I would need the following measurement areas

Neck depth and all the bust measurements by length and circumference

Next with I divide the biggest measurement part of my bust to give me the front and back bodice measurement

$42 \div 2 = 21$ (meaning 21 inch for front 21 inch for the)

Using the 21inch , I add seam allowance for side seams and center then I cut it by my half length or waist length deducting the sleeve area out.

Next I indicate with lines where my upper bust ,bust, and under bust should be . then I deducted some 6 inch for the neck and the off shoulder sleeve.

Time for pictures wink so u don't get confused.

I hope dis will b helpful
